Mama-U

Postpartum Uterus Model

Relevant design

Mama-U's postpartum uterus is designed with relevant anatomy to support learning. The flexible vagino-uterine angle and palpable fundus allow learners to practice the technique for placing a PPIUD.

Multifunctional

Can be used as a table-top task trainer; or in combination with the MamaNatalie simulator to enable an enhanced, integrated simulation experience.

Mama-U complements postpartum family planning trainings and can act as a counseling aid for healthcare providers.

Balloon tamponade insertion for PPH management.

Vaginal and cervical inspection and gauze packing.

Easy visualization of PPIUD placement.

Mama-U helps healthcare providers improve their skills in management of PPH, postpartum family planning, counseling, and respectful care.
