

SimBegin

## Creating expert simulation facilitators

A blended learning simulation facilitator course that aims to build competence and confidence in planning, conducting, and debriefing a simulation scenario.

# About SimBegin

Your companion for quality simulation-based training

## Build competence and confidence

Participants experience a transformative journey through trainings that offer a safe environment, with scenarios that mirror real-life situations, enhancing learning, competence and confidence.

## Optimal learning experience

Through self-guided e-learning, immersive online workshops and practical in-person scenarios, healthcare providers and educators are empowered to run quality simulation trainings.

## Sustainability

With multiple levels of learning, the program drives faculty development, equipping organizations to train their own faculty whenever the need arises, ensuring long-term sustainability.

## Level 1

Suited for healthcare professionals who are new to simulation based education.

### Focus areas

- Introduction to healthcare simulation
- CORE debriefing
- Implementation of simulation

## Level 2

Suited for healthcare professionals who have completed Level 1 and qualify to be a mentor.

### Focus areas

- Simulation fidelity and modalities
- Simulation for Quality Improvement
- Mentoring

## Level 3

Suited for healthcare professionals who have completed Level 1 and Level 2, and qualify to be faculty

### Focus areas

- Guidance in SimBegin
- Learning to run SimBegin courses
- Create simulation scenarios

When purchasing Level 1, users also gain access to LIFT Scenarios. Scan the QR code to learn more about this offer, and SimBegin.
